WHO WE ARE

SELTA, business unit of the Italian group **DigitalPlatforms**, is born and grown with the aim of innovating to support the digital transformation process of businesses. Leader in innovation, SELTA designs automation and telecommunications highly secure and reliable solutions for critical network infrastructures at international level.

OUR STRENGTHS

- **50 years of experience** providing customized solutions to our customers
- **100% made-in-Italy** products from conception to design and industrial production
- **high standards** of reliability and security
- **lean support** services

Network Connection, Control and Protection

TARGET CUSTOMERS

• ENERGY AND TRANSPORT UTILITIES

automation and Smart Grid solutions for electricity and gas networks embedding security by-design features; service telecommunications

• COMPANIES AND SERVICE PROVIDERS

virtual IP-PBX, on-premise and as-a-Service communication and collaboration services; Smart Working applications

• TELCO AND SERVICE PROVIDER

ultra-broadband solutions for telecommunications networks access

• GOVERNMENTS AND DEFENSE BODIES

professional services for cyber security and preparation for certification for governments, bodies of the Defense and companies; Tempest military-grade systems

PRODUCTS AND SOLUTIONS

ENERGY AND TRANSPORT NETWORKS

Solutions

- Automation of MV/HV energy plants, SCADA systems, Smart Grids
- Powerline carrier transmission
- Switches and Routers for IP networks
- Teleprotections
- Service telecommunications

Target

Electricity grid operators (production, transport, distribution), Oil & Gas markets operators, operators of the rail transport

Enel, Terna, Edison, Snam, Alstom, RFI, ABB, Ansaldo, RFF (France), SNCF (France), RTE (France), EDF (France), Endesa (Spain), Sergaz (Tunisia), Sonelgaz (Algeria), Petrobel (Egypt), PT PLN (Indonesia)

ENTERPRISE COMMUNICATION NETWORKS

Solutions

- Unified Communications platforms, Virtual IP-PBX for public and private clouds
- IP and traditional phones, softphones
- Application for unified communication and collaboration, virtualized and non-virtualized contact centers

Target

Companies of all sizes, central and local PA, Tlc Operators, Service Providers

References

TIM, Telefónica de España, Wind, Vatican Museums, Enac, De Longhi, Juventus fc, Sogei, Federal Bureau Revenue Pakistan, Public Security Directorate, Grand Hotel Bahia Tenerife

ULTRABROADBAND TELCO NETWORKS

Solutions

- Solutions for ultra-broadband access networks based on Enhanced Vectoring and g.fast for
- FTTx and Carrier Ethernet applications
- Multi Service Access Node platforms (MSAN)

Target

Tlc operators, Internet Service Providers

References

TIM

CYBER SECURITY

Solutions and consulting services

- Secure network design
- Security assessment (Common Criteria, ITSEC)
- Tempest systems
- Security infrastructure management services
- Cybersecurity

Target

- Defense Bodies
- Critical infrastructure area operators (electricity, gas and water, telecommunications)
